Hogebuilt Introduces New Single Axle Fenders

Goodlettsville, TN (March 14, 2016)

Hogebuilt has introduced two new options for the single axle fender line. The new Lowrider single fender is available with a drop of 30.5 inches while the Ultimate Lowrider measures a 35.5 inch drop. These new fenders are available in both the premium 304 perfect mirror finish and mid-grade 430 mirror shine stainless steel. With these new additions Hogebuilt offers more fender options than ever before to provide their customers with the ultimate finish for their trucks.

“Our dealers have asked for these sizes and we have listened to their requests,” said Kyle Denu, Hogebuilt President. “There is a strong need in the market for a high quality fender with these deep drops”.

Since 1944, Hogebuilt has been the leader in providing premium fenders for the trucking industry. Best known for the 304 mirror finish stainless steel fenders and suspension specific brackets, Hogebuilt quality products are made in the U.S.A. and are available in quarter, single, half-tandem and full-tandem styles.
